## Bitte NICHT lesen!

- Alle Macintosh-Fonts von MacCampus werden **komplett** geliefert, mit sauberen (!) Bildschirmfonts, Druckerfonts (fast immer im Type 1- und im TrueType-Format) und Tastaturtreibern (sofern nötig). Selbstverständlich sind jeweils alle Zeichen der betreffenden Fremdsprache vorhanden.
- Mit allen Fonts erhalten Sie eine ausführliche **Dokumentation**, die Installation, Handhabung, Tastaturbelegung, Codierung usw. beschreibt. Keine Angst, wenn Sie die betreffende Fremdsprache nicht beherrschen – Sie können die Fonts trotzdem benutzen.
- Fremdsprachenfonts tauchen wie „normale“ Fonts im **Schriftmenü** auf und werden dort wie üblich angewählt. In der Regel setzt sich eine Schriftfamilie aus vier Schnitten zusammen (normal – fett – kursiv – fettkursiv). Sie können beliebig zwischen Standardfonts für westliche Sprachen und MacCampus-Fremdsprachenfonts umschalten und sie im Text mischen.
- Alle Fonts genügen höchsten **Qualitätsanforderungen** – selbstverständlich können Sie MacCampus-Fonts auch belichten. Diese Qualität muß aber nicht mit Höchstpreisen bezahlt werden.
- Für den **Datenaustausch** zwischen PCs unter Windows und Macs stehen spezielle Fonts bzw. Text-Konverter zur Verfügung

## Please do NOT read!

- All Macintosh font packages contain everything you need to start working immediately: polished screen-fonts, printer-fonts, and, if necessary, keyboard drivers for convenient access to special characters. Of course do all fonts contain every character that is required for the language in question.
- All fonts are completely **documented**; a special booklet covers font basics like installation, use of keyboard drivers etc. Don't worry if you don't speak the foreign language yourself – this is not required for using the fonts!
- Language fonts show up on the **font menu** just like normal fonts and you select them like any other font. Usually, a font family has four weights (plain, bold, italic, bolditalic). Mixing language fonts from MacCampus and “normal” fonts is no problem.
- All fonts are of the highest possible **quality**. You may use them on an ink-jet printer as well as download them to an imagesetter.
- MacCampus offers various solutions for painless **data exchange** between PCs running Windows and Macs in the form of special fonts and converters for text files.
- MacCampus has been around nearly as long as the Mac, and will be around tomorrow; continuous development, support and service are guaranteed.

## Cyrillic Fonts

Some facts and general information about our Cyrillic fonts

- ① **Standard Encoding** series supports Apple Cyrillic encoding standard for international compatibility and data exchange. WorldScript-compatible. Languages supported include: Russian, Byelorussian, Ukrainian, Bulgarian, Macedonian, and Serbian.
- ② **Scientific Encoding** series supports educational and scientific requirements by including accented characters, old characters etc. For RomanScript, compatible with all programs.
- ③ **Large selection of high-quality fonts**, designed in cooperation with designers from Russia and other Slavic countries. Text fonts, headline fonts, novelty fonts, calligraphic fonts – everything is available.
- ④ **Many keyboard drivers included:** Russian TypeWriter, Russian Mac Keyboard, Phonetic (Transliteration), Slavic, Bulgarian, Ukrainian etc.
- ⑤ **Fonts widely in use**, strong market presence. Updates and upgrades available.
- ⑥ **System 6, System 7.** and **System 8** supported with keyboard drivers and fonts.
- ⑦ All printers supported, **PostScript** and **QuickDraw**.
- ⑧ **High quality at affordable prices**, educational discounts available.
- ⑨ **Polished bitmaps** for easy on-screen reading, even in small point sizes.

- **Languages:** Uzbek, Azerbaijani, Turkmen, Tatar, Kazakh, Kirgiz, Chuvash, Bashkir, Karakalpak, Nogai, Kumyk ...
- **Sprachen:** Usbekisch, Aserbaidschanisch, Turkmenisch, Tatarisch, Kasachisch, Kirgisisch, Tschuvaschisch, Baschkirisch, Karakalpakkisch, Nogaiisch, Kumyksch ...
- Packages use Scientific Cyrillic encoding
- Type 1 and TrueType; polished bitmaps
- Keyboard drivers supplied, but use is optional

## MosFont 05: Method

·: АИБВГДЕЈЖЅ҃ЗИЋКЛМНОПРСТОУѠФ  
Х҃ЧҮШЦГЬЫЫНЬ ѦЮАІАЖІѠѰѠѠНЯНГЛ  
ѠѠѠ : аибвгдејжѕ҃зићклмнопрстоуѠѠѡ  
үшцгьыынъ ѦюаіажіѠѰѠѠනялѡѡ ·:

- Package includes several fonts:

**Method** – standard alphabet: АИБВГДЕЈЖЅ҃ЗИЋКЛМНОПРСТОУѠѠѡ

**Method Two** – for superscripts: г҃ѣ, сѣ

**Method Plus** – more characters: ЕЕ ѨӮ ѩ Ӑ Ӗ ѺѺ ѠѺ ѩ

- The standard in Academic publishing; extensive documentation
- Complete character set with all common variants
- 50 accents and diacritics for upper and lower case letters
- All characters available as superscripts
- Extensive kerning for all diacritics (over 2.000 pairs!)
- Type 1 and TrueType; Beautiful bitmaps (from 9 to 24 points)

## MosFont 40: Kliment

·: АИБВГДЕЈЖЅ҃ЗИЋКЛМНОПРСТОУѠѠѡ  
ЧҮШЦГЬЫЫНЬ ѦЮАІАЖІѠѰѠѠНЯНГЛѠѠ :.  
·: аибвгдејжѕ҃зићклмнопрстоуѠѠѡ  
үшцгьыынъ ѦюаіажіѠѰѠѠනялѡѡ ·:

- Compatible with Method but contemporary RomanCyrillic character design
- Type 1 and TrueType; polished bitmaps; for Old Russian, OCS etc.

## CE Fonts (Central Eastern Europe • Osteuropa)

General Information • Allgemeine Informationen

- ① **Languages:** Polish, Czech, Slovak, Sorabian, Slovenian, Croatian, Hungarian, Estonian, Lithuanian, Latvian, German, Finnish, and English
- ② **Sprachen:** Polnisch, Tschechisch, Slowakisch, Slowenisch, Kroatisch, Sorbisch, Ungarisch, Estnisch, Lettisch, Litauisch, Deutsch, Finnisch, Englisch
- ③ **Standard encoding** for international compatibility and data exchange. WorldScript-compatible, but not required – fonts work with Roman-Script, too!
- ④ Font formats: **PostScript Type 1**, **TrueType**, and Type 1 GX.
- ⑤ All weights with **polished bitmaps** for easy on-screen reading.
- ⑥ Dozens of **keyboard drivers** included: country-specific (Polish, Czech, Slovak, Lithuanian...) and general-purpose (US CE, Deutsch CE etc.)
- ⑦ **Large selection** of high-quality fonts, custom conversion service available at fixed prices.
- ⑧ **System 6**, **System 7** and **System 8** supported with keyboard drivers and fonts.
- ⑨ **Converter** available for data exchange between Windows EE and Mac CE, supports plain ASCII text and RTF files.

## CrossFont 01: Roman Greek

## CrossFont 02: Greek Sans

These two packages contain Modern Greek fonts made especially for easy data exchange between Macs and PCs. Each package contains a Mac version and a Windows version of the same font. Font formats are Type 1 and TrueType. No special keyboard driver is required.

## CrossFont 03: KOI-8 Cyrillic (Internet!)

KOI-8 is the most popular encoding for Cyrillic on the Internet. To read Cyrillic Internet pages, you need Cyrillic KOI-8 fonts for your browser. This is the professional package that contains everything you need to read and edit KOI-8 text:

One proportional font, **Roman KOI8Cyr**, and a monospaced font, **Courier KOI8Cyr**, as well as two keyboard drivers, “Phonetic > KOI8” and “Russian > KOI8”. Both fonts have polished bitmaps for perfect on-screen display. Font formats are Type 1 and TrueType.

## CrossFont 04: Roman WinCyr (CP 1251)

## CrossFont 05: Ladoga WinCyr (CP 1251)

These two packages make the Windows standard encoding for Cyrillic (also known as CodePage 1251) available on the Macintosh. The fonts serve two purposes:

- a) easy\* data exchange with Windows users,
- b) browsing Cyrillic web pages that use the Windows encoding.

Besides the font, each package contains two keyboard drivers: “Phonetic > WinCyr” and “Russian > WinCyr”. Polished bitmaps guarantee perfect on-screen reading. Font formats are Type 1 and TrueType.

\* this also depends on the program you are using!

**More CrossFonts available or under development.**

# Text Converter Windows ↔ Mac for Cyrillic & Latin Eastern Europe (CE)

- Konverter für das kyrillische Alphabet und die lateinischen Alphabete Ostmitteleuropas für die Datenübertragung zwischen Mac und PC.
- Modul für "Dateien konvertieren" (Mac-Systemsoftware 7.1).
- Für reinen ASCII-Text oder RTF-Dateien.
- Converter module for use with "Apple File Exchange" (part of System software 7.1).
- Convert text files (plain ASCII, no formatting) as well as RTF files (which keep all formatting intact).
- Several converters for Cyrillic and Latin alphabets from Eastern Europe included.
